

# TCEQ Interoffice Memorandum

---

**To:** Jamie Garza, Regional Director, R16

**From:** Angela Curry, M.S. *AC*  
Toxicology, Risk Assessment, and Research Division, Office of the Executive Director

**Date:** March 4, 2022

**Subject:** Toxicological Evaluation of 2020 Ambient Air Network Monitoring Data in Region 16, Laredo

---

## Conclusions

- All 24-hour and annual average concentrations of volatile organic compounds (VOCs) from canister samples were below their respective Texas Commission on Environmental Quality (TCEQ) air monitoring comparison values (AMCVs) and would not be expected to cause acute or chronic adverse health effects, vegetation effects, or odor concerns.

## Background

This memorandum conveys the Toxicology, Research, and Risk Assessment Division's (TD) evaluation of ambient air sampling conducted at the Laredo Bridge monitoring site in Region 16-Laredo during 2020. TCEQ Region 16 monitoring site information is presented in Table 1 along with hyperlinks to detailed information regarding the monitoring site (including maps). List 1, which can be found in Attachment A, displays the target analytes for the monitoring site. The TD reviewed air monitoring results from a VOC canister sampler that collects data on a 24-hour every sixth-day schedule.

The TCEQ Monitoring Division reported the data for all chemicals evaluated in this memorandum. Data discussed in this evaluation include 84 VOCs (from a canister sampler) for the Laredo Bridge monitoring site; all data met the data completeness objective of 75 percent data return. In order to be able to evaluate 24-hour monitoring data more fully, the TCEQ has developed 24-hour AMCVs for specific chemicals. As such, 24-hour samples were compared to the available TCEQ 24-hour AMCVs (1,3-butadiene; 2,2-dimethylbutane; 2,3-dimethylbutane; 2-methylpentane; 3-methylpentane; benzene; ethylene dibromide; ethylene dichloride; and n-hexane). Twenty four-hour air samples collected every sixth-day over a year are designed to provide representative long-term average concentrations. The TD evaluated the reported annual average concentrations from 24-hour samples for each target analyte for potential chronic health and vegetation concerns by comparing annual averages of measured chemical concentrations to long-term AMCVs. Additional information regarding the derivation and application of AMCVs is available on the Toxicology [AMCV](https://www.tceq.texas.gov/toxicology/amcv/about) webpage (<https://www.tceq.texas.gov/toxicology/amcv/about>).

**Table 1. Monitoring Sites Located in TCEQ Region 16**

City and Site Location	County	Monitor ID	Monitored Compounds

<sup>a</sup>every sixth-day 24-hour canister

## Evaluation

### VOCs

The 2020 24-hour and annual average concentrations for all 84 VOCs reported at the Laredo Bridge monitoring site were below their respective long-term and 24-hour AMCVs. Adverse human health or vegetation effects would not be expected to occur as a result of short- or long-term exposure to the reported levels of these chemicals at this monitoring site.

If you have any questions or comments regarding this evaluation, please feel free to contact me at [angela.curry@tceq.texas.gov](mailto:angela.curry@tceq.texas.gov).

## Attachment A

### List 1. Target VOC Analytes in Canister Samples

1,1,2,2-Tetrachloroethane	Acetylene	Trichloroethylene
1,1,2-Trichloroethane	Benzene	Trichlorofluoromethane
1,1-Dichloroethane	Bromomethane	Vinyl Chloride
1,1-Dichloroethylene	Carbon Tetrachloride	cis-1,3-Dichloropropene
1,2,3-Trimethylbenzene	Chlorobenzene	cis-2-Butene
1,2,4-Trimethylbenzene	Chloroform	cis-2-Hexene
1,2-Dichloropropane	Chloromethane	cis-2-Pentene
1,3,5-Trimethylbenzene	Cyclohexane	m-Diethylbenzene
1,3-Butadiene	Cyclopentane	m-Ethyltoluene
1-Butene	Cyclopentene	m/p Xylene
1-Hexene & 2-Methyl-1-Pentene	Dichlorodifluoromethane	n-Butane
1-Pentene	Dichloromethane	n-Decane
2,2,4-Trimethylpentane	Ethane	n-Heptane
2,2-Dimethylbutane	Ethylbenzene	n-Hexane
2,3,4-Trimethylpentane	Ethylene	n-Nonane
2,3-Dimethylbutane	Ethylene Dibromide	n-Octane
2,3-Dimethylpentane	Ethylene Dichloride	n-Pentane
2,4-Dimethylpentane	Isobutane	n-Propylbenzene
2-Chloropentane	Isopentane	n-Undecane
2-Methyl-2-Butene	Isoprene	o-Ethyltoluene
2-Methylheptane	Isopropylbenzene	o-Xylene
2-Methylhexane	Methyl Chloroform	p-Diethylbenzene
2-Methylpentane	Methylcyclohexane	p-Ethyltoluene
3-Methyl-1-Butene	Methylcyclopentane	trans-1,3-Dichloropropene
3-Methylheptane	Propane	trans-2-Butene
3-Methylhexane	Propylene	trans-2-Hexene
3-Methylpentane	Styrene	trans-2-Pentene
4-Methyl-1-Pentene	Tetrachloroethylene	
	Toluene
